

Construction/Work Zone visibility is not only a critical requirement, cutting-edge "higher visibility" portable lighting is critical to Workers, Public Safety, and advanced protection for construction zone projects.

TriFlector™...Undeniable Solution

TriFlector's tested and proven "Assured Incident Management Solutions" are the only safety management solutions that delivers all of the higher visibility components needed to effectively secure today's Construction/Work Zone operating environments in a proactive manner. We accomplish this through:

- 360 Degree High Intensity Visibility (motorist react to a higher visibility presence, avoiding an incident, death or injuries for work zone workers/assets);
- Roadsides will remain safe and functional during construction & work zone projects, and performance of personnel;
- Emergency backup support for Construction/Work Zone signaling;
- Provides portable lighting for placement in any area where emergency and work zone lighting is required;
- Temporary lighting, traffic diversions and safely maneuvering in high traffic areas;
- Performance and Scalability (built to meet the most demanding roadway, roadside, and high traffic environments. Modular...w/best-in-class warranty);

Integrating portable higher visibility lighting into a comprehensive Construction/Work Zone Safety Strategy provides a systematic approach to "proactive assured incident management solutions on roadways."

"High Intensity Portable Solutions"

Product Specification

Visible to 1650/3050 ft. & 360 degrees
 Perfect 3/Way Triangle in three different directions (no loss of visibility including high intensity lighting source)
 Energy Capacity (2 AA Batteries) Lithium Option
 Standard LED Technology* for over 10,000 + Hours of continued lighting source operation
 Operates continually for 175 +Hrs** 1000 Model and 25 + Hrs** 5000 Model
 Weather resistant(125 degrees to -4 degrees F)
 Safety Standards (Higher Intensity Source)
 Higher Visibility Multi-Purpose Safety Protection
 Detachable (Supplemental Handheld Signal and Flashlight Combination)
 Reflective Tripod Base (Stand alone Option)
 In the folded position, TriFlector becomes a fully functional "Warning Cone"
 Folds-up, Stores in Compact Location & Lightweight 5 ¾ lbs. 23"ht. in Cone Position
 Best-in-Class Warranty (1000F Model)/(5000R Model)
 No assembly required...Fully Reusable...Fixed or Portable Configurations
 Red, Blue, White, & Yel-Grn Reflective Material
 Florescent Orange Base (for increased visibility in daylight) and Lighting source (for higher intensity visibility at night)
 Withstands 40 + Miles Per Hour Winds
 Best-In-Class Rating for "Early Warning Safety Devices"
 Complies w/U.S. DOT (FMCSA) 49 CFR 392.25 & 393.95(g). * MUTCD Type A (Flashing) and Type C (Solid On)

White Lighting Source

TriFlector™ Nighttime Higher Visibility

Globalnologies offers measurable results, lowest cost-to-value ratio...with the most effective and innovative product designs on the market today.

Modular Higher Visibility Fixed/Portable Solutions

Work Zone Incident Management Solution

“AIMS”

Save Lives and Protect Work Zone Assets

Globalnologies is the leading provider of Assured Incident Management Solutions specifically designed to decrease deaths, increase safety, and improve protection of valued Construction/Work Zone property assets by providing comprehensive protection when it's needed most...during deadly work zone/construction environments. Our safety solutions have been tested and proven to provide our customers with the most cost effective and secure incident management solutions on the market today. Each of our uniquely designed competitive products and incident management processes has received unsurpassed value with delivering to the "higher visibility portable lighting" market.

"AIMS" Work Zone Operating Objective

Globalnologies has one objective - to inform Construction/Work Zone Management of the benefits attributed to input-transformation-output safety processes through superior death and injury reduction management. At Globalnologies, our goal is to deliver beyond our customers' expectations by bridging the gap in safety and incident management tactical solutions.

Management Transformation Proposition

Globalnologies delivers an advanced Construction/Work Zone incident management solution that consistently enables our customers to recognize proactive and measurable safety results, including:

- Safety Advisory knowledge-base increased by 96-98%

- Proactive implementations for Death and injury reduction by 90-95%
- Incident management solutions and tactics increased by 70-90%
- Securing a potentially perilous and high-traffic operation environment by 90-100%
- Projects, operating environments, and safety tactical solutions satisfaction increased by 85-90%
- Death or injury benefit liabilities and loss reduction by 85-90%

Competitive Differentiation

The tested and proven Assured Incident Management Solutions are the only safety management solutions that deliver all of the higher visibility components needed to effectively secure today's Construction & Work Zone operating environments in a proactive manner. We provide more value through comprehensive safety incident management products than any other company in the higher visibility marker industry.

A True Revolutionary Incident Solution

- A true Construction/Work Zone safety solutions that provide 360 degree higher visibility both day and night
- The only single incident management solution that protects personnel and property assets for Construction Projects, dangerous traffic environments, and traffic diversions...requiring high intensity modular markers
- A solution that meets the most demanding safety requirements for portability, and incident management delivery at the highest levels, as well as proactive regulatory safety management implementations with global standard designs
- Demonstrated scalability with customizable configurations, and delivers value with best-in-class warranties for product reliability
- Industry's lowest total-cost-of-ownership through value propositions that meet or exceed the expectations of our customers, a safety product that is highly portable and user friendly
- Seamless assured incident management protection for saving lives and proactively protecting assets with multiple safety solutions - scalability.
